PROFESSIONAL SUMMARY

Multidisciplinary chemical engineer with a B.Eng. and hands-on experience in process engineering, full-stack software development, and quantitative financial analysis. Bridges engineering fundamentals with modern technology – from industrial plant operations and safety compliance to web development, API integration, and data-driven market research. Known for analytical rigour, clear communication, and a passion for automating workflows to drive operational efficiency.

TECHNICAL PROFILE

⚙️ Hyspien Hysis	📄 JavaScript Programming
🐍 Python (Basics)	📄 HTML5 / CSS3
⚙️ React.js / Node.js	🔌 API Design & Integration
🔑 Git & Version Control	📈 Financial & Technical Analysis

PROFESSIONAL SKILLS

Problem-solving · Agile / Scrum · Code Review · Data Visualisation · Financial Modelling · Team Collaboration · Technical Communication · Industrial Safety · Report Writing

EXPERIENCE

NYSC Corps Member (ICT / Admin)

September 2025 - August 2026

🏫 Newnation International Primary and Secondary School – Panshakara, Kano Nigeria

- > Facilitated ICT literacy and supported school administration with data organization and reporting.
- > Organized a career mentorship programme for final-year students, improving engagement.

Software Developer

November 2025 - June 2026

🏫 Ts Academy – Lagos, Nigeria (Remote)

- > Resolved complex code issues and eliminated critical bugs, improving deployment readiness.
- > Modernised legacy systems and fostered positive engineering culture through code reviews.

- > Served as **Moderator & Technical Mentor** — facilitating code reviews and guiding junior developers through debugging and project structuring.
- > Maintained a collaborative, high-quality learning environment across remote cohorts.

Market Analyst

October 2024 - March 2026

 *SPM Trading Limited — Kano, Nigeria (Remote)*

- > Analysed equity/forex trends, delivering data-driven reports that shaped trading strategies.
- > Streamlined reporting workflows and tracked KPIs across multiple asset classes.

Industrial Trainee — Chemical Engineering

July 2023 - August 2023

 *NDPHC/NIPP/GEREGU Gas Plant — Ajaokuta, Kogi State, Nigeria*

- > Reduced plant downtime by troubleshooting process equipment and performing routine maintenance.
- > Conducted oil/water quality analyses and assisted in SCADA-related instrumentation checks.

B.Eng. Chemical Engineering

November 2017 - July 2024

 *Bayero University · Kano State, Nigeria*

- > Studied core chemical engineering disciplines including thermodynamics, fluid mechanics, and process design.
- > Completed industrial training at NIPP Gas Plant, applying engineering principles in a live production environment.
- > Graduated with a strong foundation in process optimisation, safety, and instrumentation.

Software Development Programme

November 2025 - June 2026

 *Ts Academy Lagos State Nigeria/United Kingdom*

- > Completed structured training in full-stack web development covering React.js, Node.js, APIs, and software architecture.
